DESCRIBE THE PRESENT AND ORIGINAL (If known) PHYSICAL APPEARANCE		
<p>This is a four story rowhouse with a flat roof, brick building wall, symmetrically and proportionally organized fenestration and a stone stoop and foundation wall.</p> <p>The first floor facade is punctuated by a large, flat plate glass store window with a wooden sill and lintel and an applied metal cornice that visually separates the plate glass window from the two flat double hung windows of 2/4 lights immediately above. These windows have stone sills and splayed brick lintels.</p> <p>The facade has been modified to accomodate the plate glass window as well as the flat plate glass door to the right. Two metal panels to either side of the door compensate for the original width of the entrance. The door and panels are surmounted by a aluminum panel that separates the door and flat plate glass transom. An applied aluminum panel acts as a surrogate cornice immediately above the transom.</p> <p>The third and fourth story facades are each punctuated by three flat windows of 2/2 lights with stone sills and splayed brick lintels. The cornice carries dentils and is supported by brackets that extend onto the building wall to meet the extra molding.</p>
